SHREEHARI S V

Bengaluru, India | Gmail | +919353919651 | LinkedIn | GitHub

Career Objective

MCA student with experience in Java, Python, and React, building applications including a live cryptocurrency dashboard and computer vision-based systems. Familiar with REST APIs, databases, and full development lifecycle concepts. Seeking an entrylevel software development role to build and deploy scalable applications.

EDUCATION

MCA, BMS Institute of Technology and Management, Bengaluru | CGPA: 8.51 — 2025-2027 (Currently pursuing)

BCA, S R N M N College, Shimoga | Kuvempu University | CGPA: 9.31 — 2022 – 2025

PUC, SMSD PU College, Koppa, Chikkamagaluru | Percentage: 94% — 2020 – 2022

SSLC, Karnataka Public School Koppa, Chikkamagaluru | Percentage: 91.52% — 2020

TECHNICAL SKILLS

Programming Languages: Python, Java, C (Basic)

Database: SQL, Oracle, DBMS

Concepts: Data Structures and Algorithms, Object-Oriented Programming (OOP), SDLC, Agile

Tools & Technologies: Git, VS Code, Basic Web Development, Cursor, Antigravity, Claude, AWS NotebookLM

Soft Skills: Communication, Team Collaboration, Problem Solving, Leadership, Time Management

PROJECTS

Automated Attendance System using Image Processing:

- Built a facial recognition-based attendance system with ~90–95% recognition accuracy.
- Processed and managed 50+ student records using image encoding techniques.
- Integrated Firebase for real-time attendance tracking and secure data storage.
- Reduced manual attendance effort by ~80% compared to traditional methods.

Human Fall Detection using Deep Learning:

- Developed a real-time activity recognition system achieving ~85–90% accuracy across activities like walking, sitting, and falling.
- Implemented YOLO-based object detection using OpenCV, processing ~20 FPS live video streams.
- Trained model on a dataset of 500+ labeled samples to improve detection reliability.
- Designed system for real-time abnormal activity monitoring in healthcare and elderly safety use cases.

CoinMonitor Live CryptoTracker Dashboard: Project link: CryptoTracker

- Developed a real-time crypto dashboard using React and Tailwind CSS resulting in tracking of 100+ cryptocurrencies with live price updates and market data visualization.
- Engineered a responsive multi-device interface using Tailwind grid/flex layouts resulting in 100% compatibility across mobile, tablet, and desktop screen sizes.
- Optimized frontend performance by configuring Vite code-splitting and efficient rendering resulting in ~30–40% faster initial load time and reduced bundle size.
- Deployed the application on Vercel with CI/CD integration resulting in instant auto-deployments and 99.9% uptime availability.
